Unesco admits Spanish fascists as Franco prepares death sentences

THE DECISION by the recent UNESCO assembly to admit representation of a fascist State has produced widespread indignation and protest by men of liberal and humanist ideas, shocked at the negation by so-called democratic States of what they have previously proclaimed about fascism. We can at least rejoice that there still exists a spirit of revolt at the harlotry signified by this aid to a foul dictatorship, hatched by Hitler and Mussolini, of whom Franco is the heir.

BLOODY SUNDAY 'MOB' MONDAY

In the Socialist League was John Turner, a grocery shop manager, with two or three other Anarchistic shop assistants, he started the first National Shop Assistants' Union which, after some years of existence, was merged into a larger body, of which John Turner became a paid organiser and, finally, General Secretary.

I remember Turner debating in ages on the way. favour of "Anarchist Socialism against Herbert Burroughs of the S.D.F., in the Patriotic Club on Clerkenwell Green. How enthusiastic he and a group of us young ones were! Of course, in our view, Turner had the best of the argument.

Our enthusiasm, I hold even now, optimistic though it was, was justifiable. Everywhere, in this country and throughout the world, a great awakening of the peoples on social and economic problems was taking place. Politically, only France and Switzerland, in Europe, were republics. Centuries-old monarchies began to fall, and have been tottering ever since.

But to return to the movement itself. The great agitation which was carried on (it should always be borne in mind that it was of a voluntary character; no State department anywhere pioneered in such efforts) led to some startling developments, in which the Anarchist Socialists took their full part.

H-bomb is censored

ON SATURDAY, November 8, the news agency teleprinters, over the space of an hour, were giving news that America had exploded a hydrogen bomb. As this happened early in the evening it was expected that the Sunday papers would splash it across their front pages, for Sunday papers are always short of the material of headlines.

But the Sunday papers did not mention the bomb. On Monday a few papers had a small paragraph mentioning a rumour of a hydrogen bomb having been set off, but treating the news as a vague rumour and tucking it away, almost out of sight. It was ten days later when the papers admitted the report as news.

Now, when every paper suppresses a news item which its editor must be bursting to publish, it is obvious there must be some common source of censorship. That can only be a government department. As no official censorship exists, there must be fought. one which is hidden from the public, but which has sufficient influence with newspapers to be, itself, very effective.

This is, in a way, more dangerous than an open censorship, for it is give more power and initiative to the not responsible to any public body, central government in Washington. and cannot be abolished—for its existence is never officially admitted.

Edward VIII crisis was kept from the public for four months in 1936. Important news can be suppressed in the same way.

At the same time, we cannot understand the need to curtail the news of the hydrogen bomb, or the motive behind it. The news was out on a global scale in anyticase.

Against ALL dictators

From Barcelona we have-received four clandestine leaflets, published by our brothers of the underground C.N.T. We reprint, below, the text

DEATH TO THE DICTATORS!

Totalitarianism is the negation of human life. The dictatorship of a caste, calling itself Phalangism, Bolshevik or Nazi, signifies oppression of the people and national ruin.

No matter what the colour of the tyranny, it creates a climate of terror and death. That is what Franco has done, servilely imitating Stalin, Hitler and Mussolini.

But Spain, bled white by the abuses of this retrograde and inhuman despotism, cannot passively watch its own bankruptcy. It has known freedom and wants to regain it, no matter what the cost.

And for this we can thus resume the sovereign will of the Spaniards: NEITHER MILITARY DIC-TATORSHIP NOR CLASS

DICTATORSHIP! NEITHER THE POPE OF THE VATICAN NOR THE POPE OF MOSCOW!

NEITHER GENERALISSIMO FRANCO NOR GENERALIS-SIMO STALIN!

NEITHER THE PHALANGE NOR THE "COMMUNIST" PARTY!
