VOICE OF INDUSTRY

LITTLE FRIENDS.

Upon the subject of education, the following interesting facts may be added to those contained in the following number of this periodical, which are intended to shew the desirability of a universal system of education, and the necessity of providing a sufficient sum for the support of such an establishment.

1. The number of children engaged in the professional schools of the United States is about 200,000, and it is estimated that the cost of their education is upwards of $5,000,000. The number of children engaged in the common schools of the same country is about 2,000,000, and the cost of their education is about $20,000,000.

2. The number of children engaged in the professional schools of the United States is about 200,000, and it is estimated that the cost of their education is upwards of $5,000,000. The number of children engaged in the common schools of the same country is about 2,000,000, and the cost of their education is about $20,000,000.

10. The number of children engaged in the professional schools of the United States is about 200,000, and it is estimated that the cost of their education is upwards of $5,000,000. The number of children engaged in the common schools of the same country is about 2,000,000, and the cost of their education is about $20,000,000.

The following is an extract from a letter to the editor of the New York Tribune.

"Dear Sir,—I have read with great interest your recent article on the subject of education, and I am glad to see that you have taken up this important topic. I would like to add a few remarks of my own on the subject, which I think will be of interest to your readers.

"In the first place, I believe that education is the most important influence in the world. It is the means by which we are able to improve ourselves, and to improve others. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves.

"In the second place, I believe that education is the most important influence in the world. It is the means by which we are able to improve ourselves, and to improve others. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves.

"In the third place, I believe that education is the most important influence in the world. It is the means by which we are able to improve ourselves, and to improve others. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves.

"In the fourth place, I believe that education is the most important influence in the world. It is the means by which we are able to improve ourselves, and to improve others. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves.

"In the fifth place, I believe that education is the most important influence in the world. It is the means by which we are able to improve ourselves, and to improve others. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves.

"In the sixth place, I believe that education is the most important influence in the world. It is the means by which we are able to improve ourselves, and to improve others. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves.

"In the seventh place, I believe that education is the most important influence in the world. It is the means by which we are able to improve ourselves, and to improve others. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves.

"In the eighth place, I believe that education is the most important influence in the world. It is the means by which we are able to improve ourselves, and to improve others. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves.

"In the ninth place, I believe that education is the most important influence in the world. It is the means by which we are able to improve ourselves, and to improve others. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves.

"In the tenth place, I believe that education is the most important influence in the world. It is the means by which we are able to improve ourselves, and to improve others. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves. It is the means by which we are able to understand and appreciate the works of others, and to appreciate the works of ourselves.

"I am, Sir, your obedient servant,
