FOREWORD TO LORD
SCARMAN'S "INQUIRY"

OR

WHAT THIS LAW-LORD
WILL OMIT...

THE RIPPLE PRESS
- MCMLXXXI -

THE NEW CROSS SYNDROME

The Nationality Bill that monstrous piece of legislation straight out of Mein Kampf illuminates well the state of Britain in 1981. This old Bill will decide who is British and who is not? No doubt the colour of people's skin will be an important factor (will Japanese people be considered honorary whites as in Suid Afrikkka? Chinese people will have the same status as in apartheid-land, that is to say coloured.)

British capitalism -indeed capitalism as a whole, including the twins from the East -USSR and China, is a decaying system, riddled with contradictions, an incurable disease, despite all the reformists who claim the contrary. The British brand is in dire straits, its representatives, whether they sit in Westminster, the CBI, or as Chairmen or bosses of unions are all divided as to what should come next. The conservatives seem determined to pass this Bill that makes scapegoats out of the coloured people. A fine tactic of divide and rule, Powell started the work and Thatcher took a lot of the National Front paraphanelia into her own handbag. Obviously coloured people were "British" when they fought in two world wars and elsewhere, and were also "British" when the economic boom was in full swing, today they are immigrants to be soon deported if this Bill becomes law. We can hear the same racist noise coming from France, and the pigs who grunt this reactionary crap are none other than Marchais and Co from the so-called communist party. Another fine bunch of creeps, there too scapegoats are needed. So will Adolfa Thatcher review everyone's skin in Britain? Helping in this gruesome task -it will be like in Auschwitz at the Home Office, right you stay if you're white, left you go if you're black,- Heinrich Whitelaw and his boot boys (is this a coincidence that a Home Sec. is called by such a name?) will be there to enforce the Nationality Bill, helped no doubt by Reinhardt Rees that other fighter for black people rights (remember the infamous virginity tests that were carried out during his time as Home Sec -it must be a wonderful experience to be a member of that pigsty called the Labour Party). You can hardly hear the voices from those who "represent the people" I mean Tony Benn, Foot and Mouth, the Heffers and all the others from animal farm. All these usually loud mouths are curiously silent, even Peter Hain is mute when it comes to New Cross and the Nationality Bill, he never manages to put one plus one, where would it lead him, up shit creek no doubt, in fact many people in all parties have shares in South Africa? To publish a list of all those who have would be quite

DOWN WITH THE NATIONALITY BILL

an undertaking. Indeed when one thinks of all the ramifications of capitalism and in particular with South Africa , it is enough to make you puke, and yet Hain can remain in the Labour Party. But let's leave all this for a second and try and have a close look at the NB and the New Cross massacre , and see if the two are connected, a lot of people seem to think so, a lot is being whispered , it is time to say it loud, before another fire is lit. The most striking feature of that fire is the rapidity with which it spread throughout the house, it could only be the work of professionals -there are enough NF members with police ties^{xxx}, or maybe an "off-duty SAS team"^{xxx} to accept such a contract. The result was a first class job, some people could not even recognize their relatives , the bodies being charred beyond recognition. One person whose son was missing , even came to the conclusion that he must have perished in that fire.

The strategy of that fire -those who are behind it must have known this -would have the effect of infuriating the black community, there would be violence, the police would see to that, and they did, taunting demonstrators by their mere presence as defenders of a corrupt system, and what else can they be being cops? As all this took place as planned, the TV News cameras started to film it all, for further proofs that black people are nothing but thugs, a phrase that the entire press picked up and served to its readers the next day, coupled with " when the black tide met the thin blue line " , or another gem worthy of the street of shame , ie. Fleet street : " Rampage of a Mob ". The conservatives seem determined to pass this bloody Bill at all costs, using dirty tricks in order to divide the working class, THE STATE IS A MEAN MACHINE, the New Cross syndrome is nothing new, it has been tried out in Italy since 1969 when a bomb exploded in a Milan bank, killing eighteen people, the piazza Fontana massacre had been orchestrated by the secret services of the Italian State, since then another syndrome has emerged in that country: the Red Brigades ie. the armed appendices of that same rotten State, who pose as revolutionaries, a reality some people have not yet grasped, the same experiment was tried out in France, with the bombing in rue Copernic , indeed today it is through terrorism that the State intends to remain in business. The British police could put all its detectives on the case, and even call a few foreign colleagues, they still would not find those who set fire to that house in New Cross. For the reasons outlined^{xxx} above. The dirty tricks did not end with Watergate! These few lines are intended for those who have a thirst for truth, they are not intended for those who are content with half-truths , or those who are part of "Anti-nazi leagues" who are only there to further

their own miserable causes , like recruiting members for their statist organisations. What creepy schemes! many coloured people are aware of this. Our aim is diametrically opposed to all these schemes, only the truth interests us, the truth about everything, leaving no stones unturned is our goal. If you think what is written here is not up to your standards , please do better, however if you think the New Cross Massacre and the Nationality Bill are not connected we can only say that you are furthering the aims of those who set fire to these thirteen young people , and the Nationality Bill and its implications will be yours alone. Since proletarians have no country, you cannot take from them what they haven't got. Wage-slavery is the cause of all the ills mentioned, To abolish that cancer has become a priority for the sake of humanity!! (If you think these preliminary lines on New Cross are valid, do not hesitate to reproduce them, the more publicity the better -the message is the medium, unlike most publications there is no copyright on all this)

ALL THIS WORLD IS LIKE THIS TOWN CALLED ATLANTA-TERROR CITY!
DOWN WITH THIS INHUMANE SPECTACULAR-COMMODITY SOCIETY!
LONG LIVE ALL THOSE WHO FIGHT AGAINST IT!

Printed and Published by THE RIPPLE PRESS somewhere in Britain,
on the 16th of March 1981.

" The forensic evidence suggests the fire begun in the centre of Mrs Rudduck's front parlour by someone inside the house. Black witnesses say it began under the window and was probably caused by something being thrown into the house.

There is anger , too, about the media and public response to the fire which happened on January 18. Immediately afterwards there were front-page stories , but after that silence . There were no messages of sympathy from the Prime Minister or the Queen ."

THE TIMES Wednesday March 4 1981.

#####

" (...) I hope all those who are upset by this incident , and I understand why, will appreciate that the police are doing their best to find out the cause (...) We are a tolerant society .(...)

Mr Whitelaw speaking in the House of Commons, The Times March 6 1981.

What are you complaining about?
 In Spain they don't even have the
 appearance of democracy, but straight
 military rule, the King is a puppet
 of the Generals, the coup failed,
 the programme of the coup has
 succeeded, thank God! So continue
 to sell your labour and time, and
 shut up, it could get worse you
 know!!!!

NEW CROSS FIRE REPORT FOR DPP

By Our Crime Staff

A second report on the New Cross birthday party fire, in which 13 black teenagers died, is to be sent to the Director of Public Prosecutions this week.

It will list the progress made by 50 detectives working on the case. They are unable to say who started the blaze on Jan. 18. More reports will be submitted within the next few months.

Daily Telegraph

March 23rd 1981

If a fire broke out on Upper Crust Row -Knightsbridge, Chelsea, Belgravia... TUC HQ ...Adolfa Row...LORDS & COMMONS PIGSTIES... US & USSR & all embassies...CBI premises...Fleet Street mongers... BBC & ITV & HTV drug firms...SCOTLAND YARD terminal computer diseases...HARRODS "enter the rich world " or even TIME OUT the so-called anti-establishment...THE ARSONISTS WOULD NO DOUBT BE FOUND , even if it meant CREATING new VAN DER LUBBES...But when it comes to NEW CROSS, it is a different kettle of fish. In fact there are two laws , ONE for the RICH, one FOR the POOR..The appearance of DEMOCRACY is well illustrated by the kidnapping of R. Biggs.Fill in your consensus forms folks, 1984 is ALREADY HERE.

5

FOREWORD TO LORD SCARMAN'S INQUIRY

OR WHAT THIS LAW LORD WILL OMIT---

Many years of anger (some say 450 years!), frustration, harassment of all kinds , deprivation amidst plenty have produced riots on a scale unseen for a long time. Maybe it won't be long before those responsible for this world will not dare go out of their bunkers for fear of being mauled by dissatisfied and angry people. (Remember the King of the day who had to stay at home during the Gordon Riots of 1780). The truth of New Cross has not yet reached the newsdesks -the censors would be the appropriate word to use . And it is not Lord Scarman who will reveal the truth of that massacre and that napalm was used (the rapidity with which this fire spread suggests that only that "fuel" could have been used), we eagerly await Lord Scarman's "inquiry", in fact we say it quite categorically we have no faith in Mr Scarman's pen. He represents a class determined to stay in power, and this at all costs. Those who rule this society but who govern less and less have now no other option but tear up the Nationality Bill , for the writing on the wall is still hot with "Bristol yesterday, Brixton tomorrow", and maybe the rest of the United Kingdom in a few days !!! Police pressure in many parts of Britain is a reality that many individuals know too well. Worst pressure is the totality of this miserable life that the majority of people have to endure day after day. When Adolfa Thatcher says that the behaviour of the rioters was criminal. We would like to remind this dalek that capitalist exploitation is truly criminal, but it has an advantage it is legal. The total social labour product vampirised so that it can be reinvested into police truncheons, nuclear plants, H. bombs, prisons, armies, law courts and so-called inquiries*, in a word the State terror machine, in a word a "fine society to be in". Mr Nicolas Winterton also known as "the Aryan" (blond and blue eyes) who is a spokesdalek of the Conservative Immigration Group (Cig. ie. burnt out) recently said on Newsnight (13.4.81) that the way to deal with these riots was to stop immigration into Britain and help those who want to go back to their "country of origin". Winterton forgets one thing, many black people were born in this country. Their parents were brought in in the fifties as cheap labour. Mr Enoch Powell, the well known Greek scholar was then Minister in charge of that scheme, (another irony of history, poor Eunuch !)

*Not forgetting of course the forthcoming circus ie. the marriage of Prince Impotent and his wife Miss All-Smiles! The spectacle of happiness, a real drug!

Capitalism then needed more human fodder for its new operations , ie. the economic boom. What all these morons like T. Raison, Winterton, Thatcher, Whitelaw etc., forget is that white youth were also fighting this authoritarian society in Brixton, just as young proletarians are fighting it in W. Germany, Switzerland, etc..

Indeed there is not one day in Britain when there is not a strike of some sort. It is a society rich in lucky strikes. Even the civil servants have had enough of being pushed around like bits of paper. They rejoin their colleagues in many sectors of wage-labour who are fed up to the teeth with their miserable wage packets. (And maybe the hours wasted getting to work!!!) But when it comes to Brixton it is not an injection of work that will solve this crisis, as the Labour Shadow Home Sec. Roy Hattersley expects us to believe or Ted Knight (Lamberth Lab. Councillor) for that matter, it is rather the commodity economy (some have called it racket for years) which causes all these problems. Lord Scarman (an appropriate name for dealing with the scars of New Cross) should reflect on this simple factor: it is degrading to have to sell one's time, one's life, one's spirit to an employer, and workers who are unemployed also suffer humiliations at the hands of the SS bureaucrats, and as to make things even worse, the police , with its boot boys (SPG , another irony of history or herstory , this marvellous body of thugs was created by the Labour Party, just as the CRS in France were created by a socialist government), take note Lord S. : " What is a policeman? He is the active servant of commodities, the man in complete submission to commodities , whose job is to ensure that a given product of human labour remains a commodity with the magical property of having to be paid instead of becoming a mere fridge or rifle --a mute, passive insensible thing , itself in submission to the first comer to make use of it. Over and above the indignity of depending on a policeman , the blacks reject the indignity of depending on commodities. The Watts youth , having no future in market terms, grasped another quality of the present , and the truth of that present was so irresistible that it drew on the whole population , women , children and even sociologists who happened to find themselves on the scene " this quote is taken from a text called : The decline and fall of the "spectacular" commodity-economy written at the time of the riots in Watts . Internationale situationniste no. 10. 1966. There are similarities between Watts, Bristol and Brixton. Although we doubt sociologists (I981 vintage) finding themselves in Brixton, the nonsense written about outsiders stirring things up in that district is

just plain lies, for the population has had enough of being pushed to the outer limits. Black people are called Zulus, niggers, black bastards by cops, and some senior pigs manage to say that the community relations between themselves and the population are improving? Maybe the following example is the sort of progress the police are making: some people who live in the riot zone were at home, probably unaware of what was going on a few streets down the road, Mr Halvin Swaby's home was raided twice, his three sons were taken away, he suffered a broken arm, 4 cops jumped on him, and at one point about 50 pigs were in his home, the days of the storm troopers have come back at last!

Like Bobbi Hollon said in the Herald Tribune around the time of Watts: "These people could plunder for ten years and they wouldn't get back half the money that has been stolen from them in these shops for years". This is a thought upon which Lord Scar can reflect upon -how long will he take to word his report? He probably will have to write a few more if the Nationality Bill becomes law, in fact Lord S. is from now on a full time inquiry writer, all this world resembles Poland where conflicts erupt every day, where there is conflict, there is also life.

Earlier we spoke of deprivation amidst plenty, Thatcher said people were deprived in the thirties but they did not resort to violence, yes we remember the peaceful marches, workers were then victims of the Labour Party who preached a reformist course of action -the leaders of that pigsty still do the same job for their colleagues of the capitalist class -, but there will no going back to the thirties, we laugh at the idiots of The Right to Work circus, we prefer the right to abolish wage-slavery, it makes more sense in 1981, it makes sense to never work ever starting as soon as possible. According to a recent report in The Times heart disease has its highest rate in Scotland, and the cause of this killer disease is joblessness. This is the reality of capitalism, you die if you worry about work, it is better to turn the tables and put the blame on this system of exploitation and those who live from it. You only live once, even if some crows priests of all shades claim the contrary! Some members of this society, the fortunate ones -the cadres of the economy ie. the executives of capital and others who just happen to live in the rich quarters who shop at Harrods and Fortnum and Mason and all the other cathedrals of luxury consumption really enter a different world. But even there the "goods" are as bad as everywhere else, obviously the quality of commodities in places like that is a bit above the supermarkets in which almost everyone is forced to steal from. I wonder where Lord Inquiry shops, does he go there by Rolls? No wonder some people revolt, the contradictions are so plain to see.

Many individuals know that they have no future in this society (stewdents still believe they have one, poor creeps !) Indeed there is plenty to revolt about , whether it is the "quality of life", of "goods" (semi-durable), of "housing", of the level of police pressure & the level of lead in the atmosphere, or hereditary wealth that some idiots enjoy, at the expense of those who still pay taxes. The Royal Farm is a good case in point, the next spectacle will illustrate the decadence of Britain in 1981, some claim that the RF brings back a lot of currency, we always knew they were nothing but travelling sale shows. Some are born with a golden spoon in their mugs , others are born wage-slaves, a fine prospect that hits almost everyone from Brixton to the Shetlands, down to Land's End, it was once rumoured that someone wanted to write a book called 10 years that shook the world, we were then in 1978, 1981 has added a few more pages to that never ending project, that of living free , without any police or commodities , or the State of misery with its Nationality Bill and New Cross Syndrome.

WE DEMAND THE RELEASE OF ALL THOSE ARRESTED IN BRIXTON,
THE ABOLITION OF THE SUS LAWS & THE TEARING UP OF THE NATIONALITY BILL

This text was Printed & Published by the RIPPLE PRESS

on April 15. 1981. Somewhere in Britain.

PS: The Atlanta murders are carried out on poor black kids in order to keep the poor black population in check. A clean cut white creep even went so far to say "if you compare what is going on in the North, in Chicago, in New York or in Washington , you can write that we are a model for America." This idiot was talking to a leftist journalist from a rag called "Liberation" (Freudian slip probably).

The RIPPLE PRESS IS AT PRESENT COMPLETING A REPORT INTO ATLANTA MURDER INC.
The results of this report will soon be made public.

PPS: We laugh at the misfortunes of all lefties & others who tried to organise the rioters of Brixton (these shits don't know yet what it means not to want leaders).

PPS: Hattersley spoke of injecting work into Brixton to cure the problems, today his compere Neal Kinnock suggested that more education should be drafted in the area. Many proletarians are already beyond all these socio-democratic solutions. Hard luck for you Labour meat grinders!

Additional notes for The New Cross Syndrome & The Nationality Bill....

Nationality Bill aims to create 3 types of U.K. citizen / the most insecure type of citizen will be the Honorary British Citizen which is composed of members of the West Indian and Asian communities, whose rights to permanent domicile in the U.K. will be suspended "pending examination of their papers". Suspended citizenship is designed to emphasise the description of cultural and economic threat posed by black immigrants. On the other hand those white Africans from Zimbabwe and South Africa who have grown fat and listless in those two fascist states are assured of a fraternal welcome in the U.K. These fascists do not correspond to a cultural or economic threat to the "British way of life". / Thatcher and her troupe and Foot and his mob when it is their turn to share power, will no doubt defend this bill against the charge of racialism by saying that many blacks will have a 1st class U.K. citizenship and the right to work and vote. But let us make this fact clear, it is necessary for this power system to have a reservoir of socially alienated and disadvantaged humanity at its DISPOSAL. This group of citizens is here to be sacrificed as in New Cross, it is the red herring and the scapegoat. It is the mechanism upon which the unhappy citizen can vent frustration and violence, fear and loathing without directing his attention to where THE PROBLEM originates.

.....

On March 2nd '81 the march by black people in protest against the New Cross Sacrifice and Police Protection and the Nationality Bill was diverted away from the Palace (of Westminster) where the problem originates. Instead, the blacks were marched by the police through the streets of the center of the city, these streets lined with police are also lined with expensive stores and restaurants, as the march proceeded consumers were visibly shocked, horrified and indignant that blacks could be seen on the streets in such large numbers disrupting traffic the manoeuvres in the market place. Did the Home Secretary and the police calculate this diversion knowing that it would serve to emphasise in the minds of the outraged shoppers, workers and restaurant owners the necessity of extending controls over black immigrants by means of the Nationality Bill and an "effective" police force?

The New Cross Sacrifice serves to placate and intimidate an otherwise insecure workforce whose fear of unemployment cannot be legitimately con-

fronted but can be exploited with ease, those who may have questions to ask about New Cross and other matters have been presented with a demonstration of effective Palace-Police power; that is their answer and that is the Problem.

These notes were received on 13.4.81.

Mr Terence Lacey , gen.sec of War on want . said that Britain's cities would become a battlefield if poverty and injustice were ignored. (The Times April 15. 81). This charity hopes to fight these capitalist diseases by raising £250 000, it must be a joke, and Bill Sirs , gen.sec of the Iron & Steel Trades Confederation instead of hitting the British Steel bosses for more money, is hitting the pockets of his members by asking them for "an hour's pay ". Truly the world upside down. Sirs walks on his steel hat.

....

*For years some pub owners who are racialists had refused to serve black people, now their pubs no longer stand in Brixton, burnt to the ground. This reminds us again of the Gordon Riots when pub-landlords refused to give away drink to rioters, their taverns went up in smoke.

On the 14.3. 81, we also received the following letter :"(...) Your theory about the New Cross fire is worth thinking about. Witnesses (people at the party) are talking about a coffee table which was near where the fire started , but the police say they haven't found it. If this piece of evidence is vital then perhaps our friendly boys in blue conveniently lost it ! (...).

....

Black people are now paying the costs of being represented , Rudy Narayan chairman of the Brixton Defense Committee who still manages to talk to reporters, when in fact " some committee members had said there would be no statement ". Narayan is a middle class stooge ie. a lawyer, now the planned march or rally in Brixton for this coming Sunday, is cancelled. Well done Narayan ! No wonder Mr N " was heckled and abused by some blacks on the steps of St Matthews hall in the centre of Brixton for giving a version of what happened at the meeting ". The Times April 16. 81
