KLINIKA STILL RESISTING! - after 2 years of back and forth the autonomous centre is currently resisting evictions. Despite pepperspray-slinging bailiffs occupying part of the property they've still managed to hold a hiphop gig inside, and there are currently people occupying the roof. They've slept on that roof in freezing temperatures for 6 nights so far! **ALSO TOP WORK**

BURN BABY BURN A proudly british security firm hired by KBC bank evicted 3 elderly siblings from their 3rd farm in roscommon ireland. Not surprisingly people were pissed. A group of people stormed the farm, hospitalised a few security guards, burned their vans and took back the house and land. All in time for the family to return home for xmas. **TOP WORK!!**

ANCHORS AWAY - Squatted in 2016 for 8 months and again in 2017 when it lasted over a year, The Blue Anchor pub in Bromley-by-Bow was finally reclaimed by the owners as they prepare the area for mass redevelopment. The squatters moved on after losing in court, leaving it generously open for curious skippers and party people to use in their absence.

IT'S A MADHOUSE The Manchester kru have been busy over winter with a number of squats in the city. Market street squat was opened to protest the councils lack of a winter homelessness plan and demand an end to deaths on the streets by rough sleeping. And in their 2nd illegal eviction in a month, thugs broke into the madhouse squat, dragged people from their beds, punched and beat them. When the cops turned up they took they bailiffs side despite them not having a single piece of paper between them. And to top it off the pigs threatened to arrest the squatters & not allow them to take their stuff. **ACAB**

LONG LIVE TIDEMILL After a months-long occupation, organising & tree house living, Tidemill Garden was savagely evicted by bus-loads of bailiffs and another 120 cops. A couple of squatters got in trees & one brave, young squirrel held out for 7 hours before being removed. But the struggle is not over... Since eviction protests have continued. The council has built a wall and paid security to surround the garden 24/7. A wall so great that even Donald Trump came to visit.

But it's not that great, its fucken shit. It's already been sealed a few times, preventing the trees being cut down. Councillors are running scared, with their cars smashed and needing cops to escort them to meetings and protect them from an angry local community. Some hardened heros have set up camp outside Tidemill all winter. Take them a can if you're around the nest and look out for more actions to save tidemill save reginald.

FUCK THE DFLA - Far right extremist: please put yours head back in your ass. 13 october 2018, the sun shines over London, but with all this heat the shit that sits around stinks twice as more. as a matter of fact a lot of fascist scum flooded in the city center, DFLA. A "protest against returning jihadists", and there it was, Freedom of Speech crying blood. Every single time that one of them talks, it cries blood, it feels PAIN. However a counter-protest held by numerous group of activist and no, or should we call them human beings with a conscious, manage to stop their march, and fuck them off in the meantime. The enforcers of the law made themselves the clitoris of the fight, being in the middle and taking pleasure in being rubbed between the two part, avoiding to let escalate the protest into a riot. The counter protest ended up in waterloo bridge. we can just hope that the people who were watching went home with a shadow doubt. The stink dissipated for most, but I can still smell t.
